

QUALITY POLICY

At Scientific Drilling International, we are a global community committed to our core values.

Our core competencies in research, development, and manufacturing of hardware and software products enable us to be a worldwide leader in high-tech wellbore placement and measurement services to the energy industry.

Through total commitment from top management, our people are empowered to engage in the continual improvement of our Quality Management System (QMS), based on ISO 9001, API Q1, and API Q2 Standards.

OUR PRINCIPLES

- Strive to surpass our own performance objectives
- Dedication to our stakeholder community
- Innovative approach to continual improvement and customer satisfaction

OUR OBJECTIVES

- Standardize our global Quality Management System
- Deliver Products and Services that meet or exceed customer expectations and requirements
- Improve awareness of our QMS through training and communication

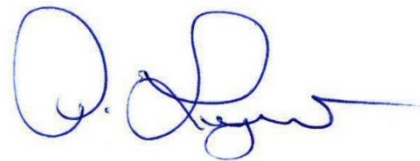

OUR METHODS

- Standardize of KPIs, scorecards, and metrics
- Deliver data-driven decisions
- Perform internal and external audits, management reviews, corrective and preventative actions on a regular basis

This Quality Policy shall be regularly monitored and reviewed to ensure ongoing effectiveness and suitability.
