

QUALITY POLICY

Scientific Drilling is committed to the provision of world-class product and service quality. As such, employees at every level of the organization have responsibilities that, when fulfilled, collectively contribute to our culture of quality and continual improvement efforts.

REPSONSIBILITIES

- + **Executive Management** provides employees with leadership, support, commitment, resourcing, and clear guidance. This responsibility incorporates systematic, risk-based processes and procedures that establish efficiency and continually improves operational/manufacturing quality.
- + **First-Line Managers and Supervisors** communicate and enforce quality policies, processes, and procedures. This supervisory group also trains employees on the essential practices needed to ensure compliance and customer satisfaction. First-Line Managers and Supervisors are accountable for performance of the quality management system within their areas of responsibility.
- + **Employees** actively participate in and comply with all quality policies, processes, and procedures.

COMMITMENTS

- + Meet or Exceed Customer Requirements
- + Continual Improvement
- + Internal Audit Process
- + Management Review Process
- + Corrective and Preventive Action Management
- + Service Delivery
- + Product Reliability
- + Performance Measurement

This Quality Policy will be monitored and reviewed annually to ensure ongoing effectiveness and suitability.
